

# SCI INFINITY'S FUTURE ROAD PLAN

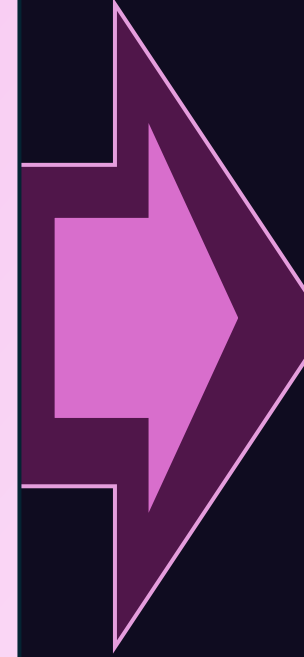

## Beginning

- Providing courses for self-development and growth: Soft skills, ICDL, and Graphic design.
- Provide training groups for: Microbiology, Biochemistry, Medicine, Computer Science, and Biotechnology.
- Provide a connection between doctors and trainees with instructions and feedback.

## Expansion 1

- Add advanced courses for: Stem cells, Cancer Biology, Genetic engineering, Python, AI and machine learning, lab Safety, and Clinical research.
- Establishing research clubs/groups where members can work on publishing scientific papers and reviews under the supervision of doctors and professors in the fields

## Expansion 2

- Establishing a scientific magazine for students and researchers to publish their ideas and spread awareness.
- Help members implement their ideas and provide the requirements for publishing a research paper.
- Uploading informative content on YouTube to inform a wider audience.

## Branching

- Partnering with other universities and learning facilities to help learners improve their skills and increase their knowledge throughout the Arab world.
- Providing funding and facilities for research projects
- Continued supervision for members by doctors and staff
